

C# Learning Journey

Day 1 using C#:

- Full Stack Developer
 - Is someone who has the skills and knowledge to work on both the front-end and back-end of a web application.
 - On the front-end , a full stack developer can work with HTML, CSS, and JavaScript to create the user interface and design of a website. They focus on the visual and interactive aspects that users see and interact with.
 - On the back-end , a full stack developer can work with server-side technologies such as databases, server frameworks, and programming languages like C# or Java.
 - What should i know for the Frontend :

- What Should I know for Backend:

- Why we are using C#?
 - It is easy to learn.
 - It is object-oriented.
 - It is a cross platform.
 - Garbage Collection.
 - Integrated with .NET Framework.
- Why using .NET?
 - It is a software framework developer by Microsoft that provides a platform for building and running applications.
 - .NET supports multiple programming languages, such as C#, Visual Basic , and F#.
 - Overall, .NET is a powerful and versatile framework that enables developers to create a wide range of applications.
